Your Excellence
Review score:
Highly Valuable

1. Took the responsibility to lead the team.
2. Learned and improved all the daily loads and background services which runs on the application, making the reports more readable and error free.
3. Set up the extra security features in the Elastic Stack (that were never there in the first place which was making the client's data more vulnerable).
4. Started the culture of following all the required activities to complete the sprint smoothly and encouraging the team members to provide their inputs as well to continuously improve the workflow.
